Knew Her by the Watch She Wore. She was a beautiful child, some 16 years, sunny, fragrant Summers had glided over her curly head, as the delectable clouds glided over those soft summer days. As the noisy train showed up at the depot her beautiful blue eyes were upturned to the coach windows and wore an anxious, expectant look. Would she come, or was she doomed to bitter disappointment? Several passengers had disembarked, and still no Fanny. Just then she half glanced up and her eye caught sight of one of those handsome \$5.00 gold watches swinging from a pretty little bow-knot, purchased of Hendricks, the jeweler opposite Morton Bank, and she knew it was Fanny, dear, sweet Fanny, who always wore the handsomest of tasty jewelry, and in a moment more they were in each other's arms.

Supt. Salmon went to Mayfield and Paducah this week, and flats are plentiful since then. R. M. is a hustler and he hustles to some purpose when it is necessary.

The only rivalry we wish to engage in is a rivalry to see who can do the most good, and those who would try to retard a good movement, must not expect any aid or comfort from us.

R. M. Salmon is entitled to our warmest thanks for his many and able defense of our position last Sunday night, and it is consoling to us to know that the sympathy of the great bulk of the people is with us.

Well and truly has it been said that music bath charms to soothe the savage breast. You should have heard the Colonel sing Sunday morning. Why, he laid the organ in the shade. But then you should remember that whatever Monck does is well done.

"I want to be a Mason, And with the Masons stand; A compass for my breastplate, And a trowel within my hand."

It now begins to look as if that hall would soon be needed here. On the night of the 8th quite a detachment went from here to St. Charles to see the Captain make his first attempt at the goat, and we are told that John acquitted himself with his usual dexterity.

We expect the organ will be here in time for services next Sunday, and we earnestly hope ALL will come out and attend meeting—those who did not help as well as those who did. Churches are organized that sinners may be brought into contact with good Christians, and thus be brought to repentance.

To accomplish this the House of God must be made as attractive as is compatible with true ideas of religion.

The musical part of the exercises was good at Sunday school, but at the evening service it was simply superb. Everything went splendidly until just at the close of service, when the harmony of the occasion was somewhat ruffled by an explanation that did not explain. We could sing a lot of mud, but prefer not to do so, as we do not propose to use this column for personal purposes or abuse of any kind, even if the proprietors of THE BEE would allow us to do so, which I don't think they would.

Mr. Hibbs, of Madisonville, representing the Story & Clark Company, brought one of their fine organs here for trial last week, and Mrs. R. J. Salmon played on it for Sunday school and evening services, last Sunday. The organ is a fine instrument, and was quite acceptable in all things save the very important matter of price.

At the conclusion of Sunday school, a short discussion was had and a vote taken, the expression of feeling, as well as the vote, being unanimously in favor of buying the Crown Organ Company's instrument, which we can get at manufacturers prices, through the kindness of a friend of R. M.'s, thus saving us all cost of commission. The organ was ordered on the 10th, and we hope to have it by next Sunday.

Aleck Malin, accompanied by Ed and Jesse, took a turn with the dogs Wednesday night, and tread what we believe to be the biggest coon ever caught in this county. He first took refuge in a regular giant of the forest, but nothing daunted, they set to work, and after a couple of hours of hard work the big tree was laid low, and out sprang his big coonship, who succeeded in eluding the dogs, but could not get far, so had to climb a sapling. "Let's go get the Majah," says Aleck. "No, no, let's get the coon," said Jesse; so down came the sapling, and then the fun began. At times it looked as though the coon would get the

best of the dogs, and then Jesse would want to pile in, but Aleck would hold him back, saying his dog could whip any coon in Hopkins county, and after a hard fight he did it. The coon was a monster, measuring four feet two inches from tip of his nose to tip of his tail, and weighing 15 pounds 6 ounces. The Major regrets not being there to enjoy the fight, which was a hard one.

There is no use in any one suffering with the cholera when Chamberlain's Colic, Cholera and Diarrhoea Remedy can be procured. It will give relief in a few minutes and cure in a short time. I have tried it and know—W. H. Clinton, Helmetta, N. J. The epidemic at Helmetta was at first believed to be cholera, but subsequent investigation proved it to be a violent form of dysentery, almost as dangerous as cholera. This remedy was used there with great success. For sale by St. Bernard Drug Store, Earlington; Ben T. Robinson, Morton's Gap; George King, St. Charles.

SHRINKAGE OF HAY. Loses Less in Weight Than is Generally Expected.

There is no fixed or established amount of water in hay, but the quantity varies with circumstances. Farmers deciding according to their judgment differ in the amount of drying grass. The more nearly the grass ripens the freer from water it commonly becomes. In a dry hot summer it is usually found drier than in a wet season. It made quite dry it would not lose much if any weight the next spring. Where weighing has been frequently practiced it has been found actually to increase in weight as the weather became more moist in autumn after a dry summer. The amount of water would vary with the mode of stowing it away. If in small and loose masses it would dry or become heavier faster than when placed in a large and solid stack, or if packed away solid in a large barn. Farmers who have weighing scales (which every farmer should possess) may settle such questions accurately by weighing single loads when the hay is made and the mass again in autumn, or during the following winter or spring. As a general rule it may be laid down that the same quantity of hay is lighter in April than in the previous August; and although the weight is subject to various fluctuations, on the whole it becomes lighter in time, but less so than many farmers generally suppose.—Country Gentleman.
